Art Unit: 1731

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-33, drawn to process for monitoring dewatering of a web, classified in class 162, subclass 198.
- II. Claims 34-49, drawn to a monitoring apparatus, classified in class 162, subclass 263.

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus does not have to measure water from a paper machine, but could be used to measure coatings from a paper-coating machine. The method steps, e.g. "water flowing", cannot be given probative weight in an apparatus claim. The apparatus of Group II could be used to measure liquids other than water.

A telephone call was made to Mr. Mueller, on March 5, 2003, to request an oral election to the above restriction requirement, but did not result in an election being made.

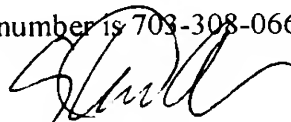

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Steve Alvo whose telephone number is 703-308-2048. The examiner can normally be reached on 6:00 AM to 2:30 PM.
